

## **TVR Communications' pCare™ Interactive Patient Systems and CBORD Partner To Improve The Patient Nutrition Experience**

**October 11, 2017** - New York, NY – TVR Communications and CBORD® announce today an integrated dietary solution that pairs pCare™ Interactive Patient Systems, the multi-year recipient of the KLAS Category Leader rating (2015-2017 Best in KLAS: Software and Services Report), with CBORD's leading healthcare nutrition solutions.

The integrated solution makes nutrition services more efficient for hospitals by automating meal ordering. Hospitals can now easily manage diet orders to meet individual nutritional requirements and ensure patient safety and regulatory compliance.

For patients, mealtime is simplified with self-service ordering through pCare. Patients receive customized menus and food choices based on their diet order and individual nutrition requirements. The innovative design integrates meal ordering into an interactive entertainment, education, and care management system. The unique partnership with CBORD ensures patient safety and nutritional wellness support.

"We're very excited to partner with the leader in patient nutrition systems," states Frank Forte, Chief Business Development Officer, TVR Communications. "It's been terrific working with such an innovative team to develop a solution that not only improves the patient experience, but also helps our hospital partners realize operational efficiencies."

"At CBORD our goal is to put the patron at the center of everything we do, and TVR Communications shares this goal," says Jim Hoefflin, CBORD President. "That's why our partnership is successful. We're working together to create the best possible patient experience."
